# EU Registry

Package 'EURegistry - INSPIRE PF extension'

The EU Registry application schema imports and extends a modified version of the INSPIRE 'Production And Industrial Facilities - Core' application schema (v4.0).

Find below changes implemented in the INSPIRE PF:

- '**pointGeometry**' --> multiplicity of the 'pointGeometry' element has been changed from [0..1] to [1..1] both in the *ProductionInstallation* feature type and in the *ProductionInstallationPart* feature type
- '**status**' --> multiplicity of the 'status' element has been changed from [1..\*] to [1..1] and stereotype is no more voidable. This has been made for the *ProductionFacility*, the *ProductionInstallation* and the *ProductionInstallationPart* feature types
- '**Activity Complex import**': a modified version of the Activity Complex core is imported, in which the geometry of the Activity Complex is forced to be point.

All implemented changes do not break INSPIRE rules, since they operate on INSPIRE-allowed values (they are restrictions on the domain).

## EU Registry data model diagram

GML diagram in package 'EUReg'

Fields for which no multiplicity is given, are supposed to be mandatory i.e. multiplicity = [1..1]

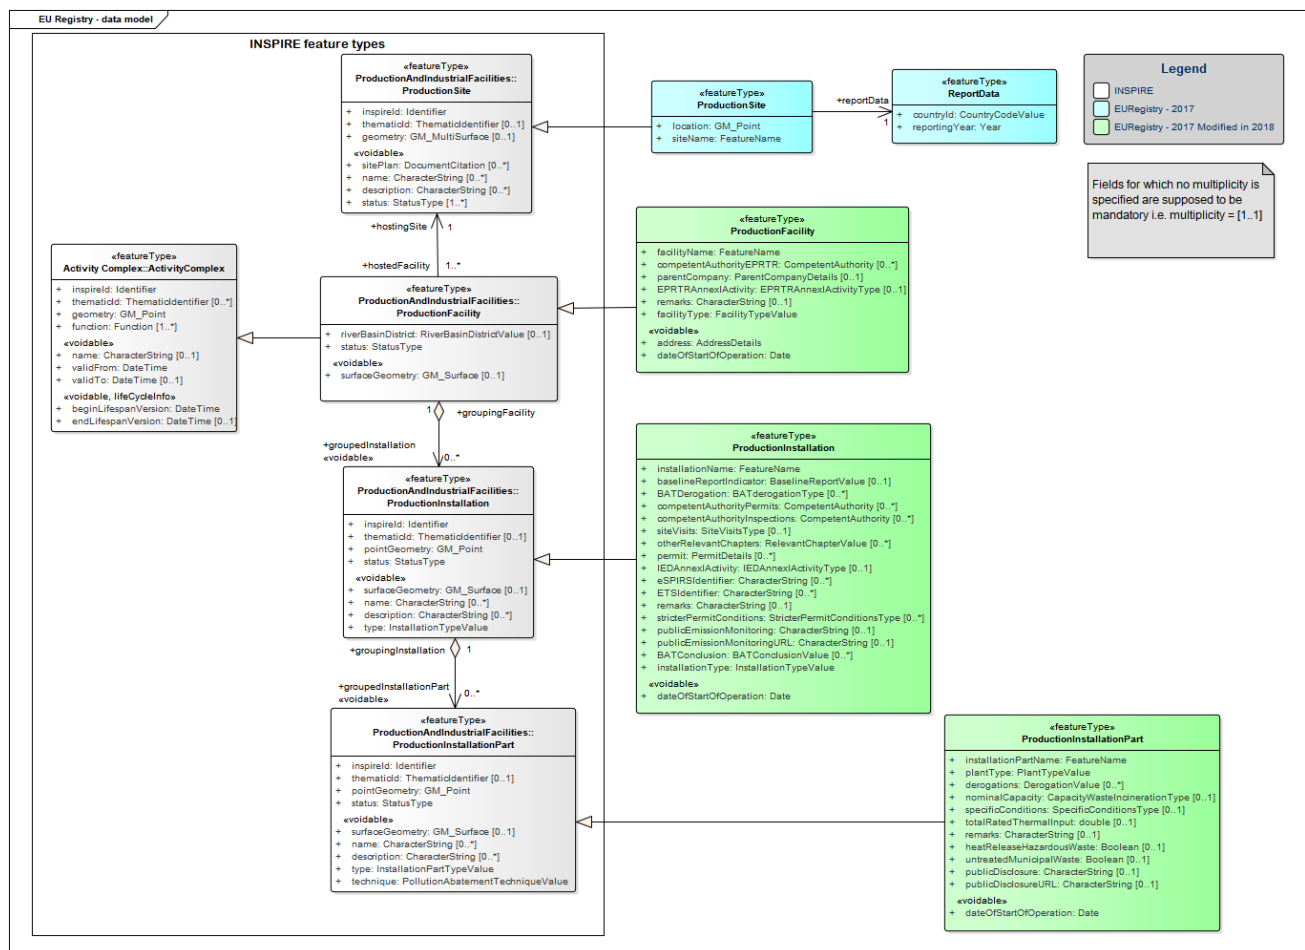

Figure 1: EU Registry data model

# EU Registry data types diagram

Class diagram in package 'EUReg'

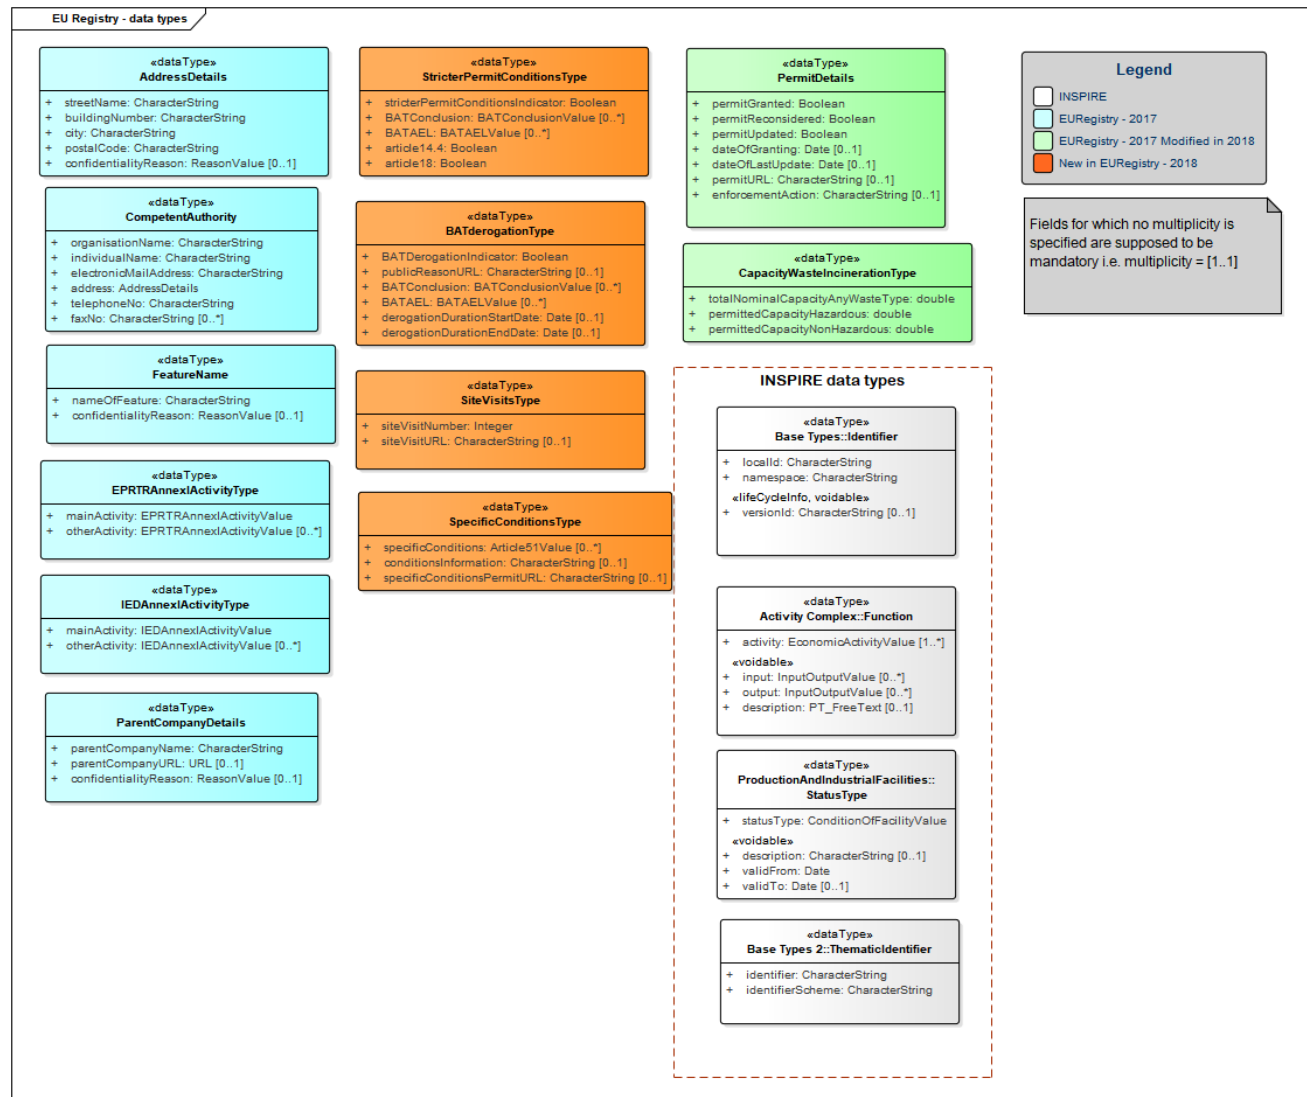

Figure 2: EU Registry data types

# EU Registry code lists diagram

Class diagram in package 'EUReg'

## AddressDetails

«dataType» in package 'EUReg'

ATTRIBUTES
◆ streetName : CharacterString
◆ buildingNumber : CharacterString
◆ city : CharacterString
◆ postalCode : CharacterString
◆ confidentialityReason : ReasonValue Multiplicity: ( [0..1] )

## Article51Value

«codeList» in package 'EUReg'

<http://dd.eionet.europa.eu/vocabulary/euregistryonindustrialsites/Article51Value/>

## BATderogationType

«dataType» in package 'EUReg'

ATTRIBUTES
◆ BATDerogationIndicator : Boolean
◆ publicReasonURL : CharacterString Multiplicity: ( [0..1] )
◆ BATAEL : BATAELValue Multiplicity: ( [0..1] )
◆ derogationDurationStartDate : Date Multiplicity: ( [0..1] )
◆ derogationDurationEndDate : Date Multiplicity: ( [0..1] )

## CapacityWasteIncinerationType

«dataType» in package 'EUReg'

ATTRIBUTES
◆ totalNominalCapacityAnyWasteType : double
◆ permittedCapacityHazardous : double
◆ permittedCapacityNonHazardous : double

## CompetentAuthority

«dataType» in package 'EUReg'

ATTRIBUTES
◆ organisationName : CharacterString
◆ individualName : CharacterString
◆ electronicMailAddress : CharacterString
◆ address : AddressDetails
◆ telephoneNo : CharacterString
◆ faxNo : CharacterString Multiplicity: ( [0..*] )

## CountryCodeValue

«codeList» in package 'EUReg'

<http://dd.eionet.europa.eu/vocabulary/euregistryonindustrialsites/CountryCodeValue/>

## DerogationValue

«codeList» in package 'EUReg'

<http://dd.eionet.europa.eu/vocabulary/euregistryonindustrialsites/DerogationValue/>

## EPRTRAnnexIActivityType

«dataType» in package 'EUReg'

ATTRIBUTES
 mainActivity : EPRTAnnexIActivityValue
 otherActivity : EPRTAnnexIActivityValue Multiplicity: ( [0..*] )

## EPRTAnnexIActivityValue

«codeList» in package 'EUReg'

<http://dd.eionet.europa.eu/vocabulary/euregistryonindustrialsites/EPRTAnnexIActivityValue>

## FeatureName

«dataType» in package 'EUReg'

ATTRIBUTES
 nameOfFeature : CharacterString
 confidentialityReason : ReasonValue Multiplicity: ( [0..1] )

## IEDAnnexIActivityType

«dataType» in package 'EUReg'

ATTRIBUTES
 mainActivity : IEDAnnexIActivityValue
 otherActivity : IEDAnnexIActivityValue Multiplicity: ( [0..*] )

## IEDAnnexIActivityValue

«codeList» in package 'EUReg'

<http://dd.eionet.europa.eu/vocabulary/euregistryonindustrialsites/IEDAnnexIActivityValue/>

## NACEValue

«codeList» in package 'EUReg'

<http://dd.eionet.europa.eu/vocabulary/euregistryonindustrialsites/NACEValue/>

OUTGOING STRUCTURAL RELATIONSHIPS
-----------------------------------

**OUTGOING STRUCTURAL RELATIONSHIPS**

← Generalization from «codeList» NACEValue to «codeList» EconomicActivityValue  
 [ Direction is 'Source -> Destination'. ]

## ParentCompanyDetails

«dataType» in package 'EUReg'

**ATTRIBUTES**

parentCompanyName : CharacterString

parentCompanyURL : URL  
 Multiplicity: ( [0..1] )

confidentialityReason : ReasonValue  
 Multiplicity: ( [0..1] )

## PermitDetails

«dataType» in package 'EUReg'

**ATTRIBUTES**

permitGranted : Boolean

permitReconsidered : Boolean

permitUpdated : Boolean

dateOfGranting : Date  
 Multiplicity: ( [0..1] )

dateOfLastUpdate : Date  
 Multiplicity: ( [0..1] )

permitURL : CharacterString  
 Multiplicity: ( [0..1] )

enforcementAction : CharacterString  
 Multiplicity: ( [0..1] )

## PlantTypeValue

«codeList» in package 'EUReg'

<http://dd.eionet.europa.eu/vocabulary/euregistryonindustrialsites/PlantTypeValue>

## ProductionFacility

*«featureType» in package 'EUReg'*

Extends ProductionFacility

**OUTGOING STRUCTURAL RELATIONSHIPS**

← Generalization from «featureType» ProductionFacility to «featureType» ProductionFacility  
[ Direction is 'Source -> Destination'. ]

**ATTRIBUTES**

◆ address : AddressDetails  
[ Stereotype is «voidable».]

◆ facilityName : FeatureName

◆ competentAuthorityEPRTTR : CompetentAuthority  
Multiplicity: ( [0..\*] )

◆ parentCompany : ParentCompanyDetails  
Multiplicity: ( [0..1] )

◆ dateOfStartOfOperation : Date  
[ Stereotype is «voidable».]

◆ EPRTTRAnnexIActivity : EPRTTRAnnexIActivityType  
Multiplicity: ( [0..1] )

◆ remarks : CharacterString  
Multiplicity: ( [0..1] )

◆ facilityType : FacilityTypeValue

# ProductionInstallation

«featureType» in package 'EUReg'

Extends ProductionInstallation

## OUTGOING STRUCTURAL RELATIONSHIPS

← Generalization from «featureType» ProductionInstallation to «featureType» ProductionInstallation  
[ Direction is 'Source -> Destination'. ]

## ATTRIBUTES

installationName : FeatureName

baselineReportIndicator : BaselineReportValue  
Multiplicity: ( [0..1] )

BATDerogation : BATderogationType  
Multiplicity: ( [0..\*] )

competentAuthorityPermits : CompetentAuthority  
Multiplicity: ( [0..\*] )

competentAuthorityInspections : CompetentAuthority  
Multiplicity: ( [0..\*] )

dateOfStartOfOperation : Date

[ Stereotype is «voidable». ]

siteVisits : SiteVisitsType  
Multiplicity: ( [0..1] )

otherRelevantChapters : RelevantChapterValue  
Multiplicity: ( [0..\*] )

permit : PermitDetails  
Multiplicity: ( [0..\*] )

IEDAnnexIActivity : IEDAnnexIActivityType  
Multiplicity: ( [0..1] )

eSPIRSIdentifier : CharacterString  
Multiplicity: ( [0..\*] )

ETSIdentifier : CharacterString  
Multiplicity: ( [0..\*] )

remarks : CharacterString  
Multiplicity: ( [0..1] )

stricterPermitConditions : StricterPermitConditionsType  
Multiplicity: ( [0..\*] )

publicEmissionMonitoring : CharacterString  
Multiplicity: ( [0..1] )

publicEmissionMonitoringURL : CharacterString  
Multiplicity: ( [0..1] )

**ATTRIBUTES**

- ◆ BATConclusion : BATConclusionValue  
Multiplicity: ( [0..\*] )
- ◆ installationType : InstallationTypeValue

## ProductionInstallationPart

*«featureType» in package 'EUReg'*

Extends ProductionInstallationPart

**OUTGOING STRUCTURAL RELATIONSHIPS**

- ← Generalization from «featureType» ProductionInstallationPart to «featureType» ProductionInstallationPart  
[ Direction is 'Source -> Destination'. ]

**ATTRIBUTES**

- ◆ installationPartName : FeatureName
- ◆ plantType : PlantTypeValue
- ◆ dateOfStartOfOperation : Date  
[ Stereotype is «voidable».]
- ◆ derogations : DerogationValue  
Multiplicity: ( [0..\*] )
- ◆ nominalCapacity : CapacityWasteIncinerationType  
Multiplicity: ( [0..1] )
- ◆ specificConditions : SpecificConditionsType  
Multiplicity: ( [0..1] )
- ◆ totalRatedThermalInput : double  
Multiplicity: ( [0..1] )
- ◆ remarks : CharacterString  
Multiplicity: ( [0..1] )
- ◆ heatReleaseHazardousWaste : Boolean  
Multiplicity: ( [0..1] )
- ◆ untreatedMunicipalWaste : Boolean  
Multiplicity: ( [0..1] )
- ◆ publicDisclosure : CharacterString  
Multiplicity: ( [0..1] )
- ◆ publicDisclosureURL : CharacterString  
Multiplicity: ( [0..1] )

## ProductionSite

*«featureType» in package 'EUReg'*

Extends ProductionSite

**OUTGOING STRUCTURAL RELATIONSHIPS**

← Generalization from «featureType» ProductionSite to «featureType» ProductionSite  
 [ Direction is 'Source -> Destination'. ]

**ATTRIBUTES**

location : GM\_Point

siteName : FeatureName

**ASSOCIATIONS**

Association (direction: Source -> Destination)

Source: (Class) ProductionSite «featureType»

A report refers to one or more Production site

Target: reportData (Class) ReportData  
 «featureType»

Cardinality: [1]

## ReasonValue

«codeList» in package 'EUReg'

<http://dd.eionet.europa.eu/vocabulary/euregistryonindustrialsites/ReasonValue>

## RelevantChapterValue

«codeList» in package 'EUReg'

<http://dd.eionet.europa.eu/vocabulary/euregistryonindustrialsites/RelevantChapterValue/>

## ReportData

«featureType» in package 'EUReg'

**ATTRIBUTES**

countryId : CountryCodeValue

reportingYear : Year

**ASSOCIATIONS**

Association (direction: Source -> Destination)

Source: (Class) ProductionSite «featureType»

A report refers to one or more Production site

Target: reportData (Class) ReportData  
 «featureType»

Cardinality: [1]

## SiteVisitsType

«dataType» in package 'EUReg'

ATTRIBUTES
◆ siteVisitNumber : Integer
◆ siteVisitURL : CharacterString Multiplicity: ( [0..1] )

## SpecificConditionsType

«dataType» in package 'EUReg'

ATTRIBUTES
◆ specificConditions : Article51Value Multiplicity: ( [0..1] )
◆ conditionsInformation : CharacterString Multiplicity: ( [0..1] )
◆ specificConditionsPermitURL : CharacterString Multiplicity: ( [0..1] )

## StricterPermitConditionsType

«dataType» in package 'EUReg'

ATTRIBUTES
◆ stricterPermitConditionsIndicator : Boolean
◆ BATAEL : BATAELValue Multiplicity: ( [0..1] )
◆ article14.4 : Boolean
◆ article18 : Boolean

## BATAELValue

«codeList» in package 'EUReg'

<http://dd.eionet.europa.eu/vocabulary/euregistryonindustrialsites/BATAELvalue>

## BATConclusionValue

«codeList» in package 'EUReg'

<http://dd.eionet.europa.eu/vocabulary/euregistryonindustrialsites/BATConclusion>

## BaselineReportValue

«codeList» in package 'EUReg'

<http://dd.eionet.europa.eu/vocabulary/euregistryonindustrialsites/BaselineReportValue>

## ConditionOfFacilityValue

«codeList» in package 'EUReg'

<http://dd.eionet.europa.eu/vocabulary/euregistryonindustrialsites/ConditionOfFacilityValue/>

## FacilityTypeValue

Class «codeList» in package 'EUReg'

<http://dd.eionet.europa.eu/vocabulary/euregistryonindustrialsites/FacilityTypeValue>

## InstallationTypeValue

Class «codeList» in package 'EUReg'

<http://dd.eionet.europa.eu/vocabulary/euregistryonindustrialsites/InstallationTypeValue>
